## ABRF Membership Matters

### Timely Publications to Help You Stay Informed

ABRF now hosts Virtual Town Halls for its members to network with, learn from and support each other in today's challenging environment. We encourage you to participate in these general and technology-specific discussions listed on the [ABRF COVID-19 Resource Page](#)

Please stay safe and healthy.

In addition to these timely ways to engage, ABRF members are encouraged to contribute original content to the ***Journal of Biomolecular Techniques (JBT)*** – ABRF's own peer-reviewed journal. JBT is an open-access publication featuring articles on new research by ABRF members, including the work of ABRF Research Groups. ABRF members are invited to submit their [ideas](#) for new articles. Publishing in *JBT* is an accessible way for you to advance your career and elevate your professional profile.

You will find the current and archived issues of JBT [online](#).

ABRF members can also explore publications and resources produced by FASEB, including:

***The FASEB Journal*** publishes international, transdisciplinary research covering all fields of biology at every level of organization: atomic, molecular, cell, tissue, organ, organismic and population. While the journal strives to include research that cuts across the biological sciences, it also considers submissions that lie within one field, but may have implications for other fields as well. The journal seeks to publish basic and translational research, but also welcomes reports of pre-clinical and early clinical research. In addition to research, review, and hypothesis submissions, *The FASEB Journal* also seeks perspectives, commentaries, book reviews, and

similar content related to the life sciences in its  
Up Front section.

***FASEB BioAdvances*** serves the global bioscience community by providing a vehicle for publishing well-designed and executed original research, review, and hypothesis papers, as well as reports on the replication of other published work—regardless of perceived or anticipated citation “impact.” Published articles must be of credible design and sound science.

These publications help ABRF members stay informed about the changes in research and biomolecular technology.

If you have any questions about these publications, or other suggestions to improve the ABRF membership experience, please contact us.

Thank you for your continued participation in ABRF.
