PRG2009 Relative Protein Quantification in a Clinical Matrix Study

– Sample and Survey Info –

PRG2009 participants,

The PRG study samples have been sent out. If you have not received your sample set by Wednesday, December 3, please contact the PRG at PRG2009anonymous@gmail.com.

Regarding reconstituting the lyophilized samples: the samples have been resolubilized successfully in water, and in Tris NaCl buffer; we anticipate that other solvents can be used as well.

The central repository of information pertaining to this study is located on the PRG website at <http://www.abrf.org/prg>, under "Studies". Links are provided to copies of the original announcement letter and the letter that accompanied the samples, as well as to amino acid sequence and mass spec data on the proteins of interest.

For reporting study results, please use the following link to access the online survey:

http://www.surveymonkey.com/s.aspx?sm=j_2fWVUL_2fHg1YFbXuWoW4Uiw_3d_3d.

Thanks for your participation in the PRG2009 study. We look forward receiving your results!
