### ***Optional Submission of Raw Data***

Dear Colleagues,

Thank you once again for participating in the Proteomics Standards Research Group's (sPRG) Study 2006. To our knowledge, there has never been a study of this scope conducted before now. Hence, the original datasets from the analyses of the study sample will be of great value to bioinformaticians. The sPRG strongly encourages all study participants to voluntarily upload their raw data files and/or derived peak lists, or both, here:

<http://www.proteomecommons.org/dev/abrf/>

This webpage has a publicly accessible, anonymous method to ask questions about the data submission process. Answers to these questions will be posted on the FAQ if they are of general value. If you experience difficulties with the upload process, you may also contact Jayson Falkner: [jfalkner@umich.edu](mailto:jfalkner@umich.edu)

If you prefer to submit your raw files on a CD or DVD, please use the following address:

Jayson Falkner  
300 North Ingalls Building, room 1196  
University of Michigan  
Ann Arbor, Michigan 48109

**Submission of raw data is OPTIONAL and NOT a requirement to participate in the study.**

All questions about the sPRG Study 2006 should be directed to the study anonymizer, Lora Goodridge: [lq161@columbia.edu](mailto:lq161@columbia.edu)

As for survey results, only the contributor's anonymous identification code will be used to label submitted data. However, for a higher level of anonymity we recommend that you use file and directory names that cannot reveal your identity **at the time you record your raw data**. Please submit your data no later than **Friday, December 2, 2005**.

If necessary, we will post updates about the study at the ABRF sPRG web site:

<http://www.abrf.org/index.cfm/group.show/ProteomicsStandardsResearchGroup.47.htm>

We thank you for your support of the ABRF and your participation in this study!
