

ABRF Membership Matters May 2026

ABRF Regional Chapters – Engagement Options Coast-to-Coast

Plan now to attend one (or more) of the ABRF regional Chapter meetings this year, to connect with colleagues in your area. From Massachusetts to California, ABRF regional chapter events are accessible, affordable options to build your network, learn more about the latest technology developments and management best practices in shared research resources, and ask questions to commercial partners on how to make the most of the instruments used in your facility.

Each ABRF Regional Chapter is led by an Organizing Committee of local members who develop a meeting program to meet the needs of their communities. Visit the [Chapters'](#) page on the ABRF web site for more information and to learn about registration options for the 2026 lineup of events.

We look forward to seeing you at one of these valuable events this year.

Thank you for being a part of the ABRF community.
